### Description

**STEP** 1. Remove the old bush bearing and housing.  
2. Insert the new bush bearing and housing into the frame.  
3. Tighten the force screw to secure the assembly.  
4. Check the alignment and operation of the suspension.  
5. Repeat the process for the other side of the vehicle.  
6. Test drive the vehicle to ensure proper function.  
7. Clean up the work area and dispose of the old parts.  
8. Store the new parts in a dry, clean location.  
9. Contact HCB Specialty Tools for more information.  
10. Thank you for choosing HCB Specialty Tools.
