Description

DESCRIPTION
The H.C.B-L1029 is a crankshaft damper remover. It is used to remove and install the crankshaft pulley. The tool consists of a long shaft, a bracket, a pulley, and five screws. The bracket is used to hold the pulley in place while the damper is being removed or installed. The pulley is used to turn the crankshaft. The screws are used to secure the bracket to the pulley. The long shaft is used to turn the pulley. The tool is made of high quality steel and is designed to last for many years. It is a must-have for any mechanic who works on Jaguar or Land Rover vehicles.
